

LightRail Seminar

17 September 2026 @14:00-16:30

Steno Diabetes Center AUH, Entrance A, Verdensrummet (A201-170), AUH

Immunometabolism – from mechanisms to clinical translation

Immunometabolism in cardiometabolic disease: from human tissues to inflammatory resolution

Emma Börgeson, Department of Biomedicine, AU/Steno Diabetes Center AUH

Single-Cell Functional Profiling Reveals the Metabolic Complexity of Humoral Immune Responses

Klaus Eyer, Department of Biomedicine, AU

Immune-to-Brain Signaling Shapes Hedonic Responding and Food Intake After Inflammatory Insult

Anna Mathia Klawonn, Department of Biomedicine, AU

Personalized Methods to Capture Human immunometabolism

Bianca Suur, Department of Biomedicine, AU/Steno Diabetes Center AUH

Networking - Coffee Exchange

Connect with someone you do not usually collaborate with and discuss the following questions:

- What is one immunometabolism question that needs better methods?
- What is one clinical setting where this could matter?

Registration deadline

10 September

Steno Diabetes Center AUH,
Entrance A, Verdensrummet
(A201-170), AUH

Everyone, incl. PhD students

HOSTED BY THE INFLAMMATION NETWORK &
THE GRADUATE SCHOOL OF HEALTH
